

Printing date 09/18/2015

Version number 60

Reviewed on 09/18/2015

1 Identification

· Product identifier

- · Product number CLT7
- · Trade name: Kromolux conc. Classic Walnut

• Relevant identified uses of the substance or mixture and uses advised against Paint and relative material only for wood • Application of the substance / the mixture For professional use

· Details of the supplier of the safety data sheet

- Manufacturer/Supplier: IVM Chemicals srl Viale della Stazione 3 - 27020 Parona (PV) Italy tel +39 038425441
- Information department: Environmental Health and safety office hseoffice @ivmchemicals.com
- Emergency telephone number: ChemTel Expert Assistance Hotline/SDS Fax Access by dialing 1-800-255-3924 or for International +1-813-248-0585.

4 First-aid measures

· Description of first aid measures

• General information:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

· After inhalation:

Supply fresh air and to be sure call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

- · After skin contact: Immediately wash with water and soap and rinse thoroughly.
- After eye contact:

Řinse opened eye for several minutes under running water. If symptoms persist , consult a doctor.

• After swallowing: Do not induce vomiting; immediately call for medical help.

· Information for doctor:

- · Most important symptoms and effects, both acute and delayed
- For symptoms and effects caused by substances, refer to Section 11.
- Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

5 Fire-fighting measures

· Extinguishing media

- · Suitable extinguishing agents: Alcohol resistant foam, CO, powder, water spray/mist.
- · For safety reasons unsuitable extinguishing agents:
- Do not use a jet water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture

Formation of toxic gases is possible during heating or in case of fire.

· Advice for firefighters

Cool by spraying with water the containers to prevent product decomposition and the development of substances potentially hazardous for health and also, in the case of closed containers exposed to flames to prevent explosions.

Protective equipment:

Hardhat with visor, fireproof clothing, suitable gloves and if necessary respiratory protective device.

6 Accidental release measures

• **Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation

| Keep away from ignition sources | |
| • Environmental precautions: | |
| Do not allow product to reach sewage system or any water course. | |
| Inform respective authorities in case of seepage into water course or sewage system | п. |
| Do not allow to enter sewers/ surface or ground water. | |
| Methods and material for containment and cleaning up: | |
| Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, Dispose contaminated material as waste according to Section 13. | sawdust). |
| Ensure adequate ventilation. | |
| Do not flush with water or aqueous cleansing agents | |
| · Reference to other sections | |
| See Section 7 for information on safe handling. | |
| See Section 8 for information on personal protection equipment. | |
| See Section 13 for disposal information. | |
| | |
| | |
| 7 Handling and storage | |
| Handling: Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. Protect against electrostatic charges. Use explosion-proof apparatus / fittings and spark-proof tools. Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. | |
| Protect against electrostatic charges. | |
| · Conditions for safe storage, including any incompatibilities | |
| · Storage: | |
| • Requirements to be met by storerooms and receptacles: Provide solvent resistant, sealed floor. | |
| Observe the label precautions, the expiration date for the use, if not inc | licated is from |
| delivery date of goods. | |
| In cases where there is no reported expiration date , it means that the produc | ct must be used |
| within 8 months. | |
| · Information about storage in one common storage facility: Not required. | |
| Further information about storage conditions: Keep receptacle tightly sealed. | |
| • Specific end use(s) Those typical of the product and the instructions in the data sh | eet if required. |
| | |
| 8 Exposure controls/personal protection | |

· Additional information about design of technical systems: No further data; see item 7.

• Additional information: The lists that were valid during the creation were used as basis.

· Exposure controls

· Personal protective equipment:

- General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.
- · Breathing equipment:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air. • Protection of hands:

Protective gloves

Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

The glove material has to be impermeable and resistant to the product .

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles

10 Stability and reactivity

· Reactivity typical of the product as indicated in the data sheet

- Chemical stability The product is stable in normal conditions of storage and use recommended • Thermal decomposition / conditions to be avoided:
 - No decomposition if used according to specifications.
- · Possibility of hazardous reactions Vapours may form explosive mixtures with air
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: No dangerous decomposition products known.

11 Toxicological information

· Information on toxicological effects May damage fertility or the unborn child.

- · Behavior in environmental systems:
 - Bioaccumulative potential No further relevant information available. • Mobility in soil No further relevant information available.
- · Ecotoxical effects:
 - · Remark: Harmful to fish
- · Additional ecological information:
 - · General notes:
 - Water hazard class 1 (Self-assessment): slightly hazardous for water
 - Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
 - Harmful to aquatic organisms
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

- · Recommendation:
- Must not be disposed of together with household garbage. Do not allow product to reach sewage system.
- Hand over to hazardous waste disposers.
- Dispose of contents and container in accordance with local state and federal regulations.
- · Uncleaned packagings:
 - Recommendation: Disposal must be made according to official regulations.
