

## PRODUCT OVERVIEW

The 3M™ PPS™ (*Paint Preparation System*) is a unique, closed paint system which eliminates the need for separate mixing cups and filters.

Instead, paint is mixed in a liner bag which marries to a direct filter and is then mounted on the spray gun with a dedicated adapter. As freshly filtered paint is dispensed, the liner bag collapses, allowing the spray gun to function at any angle.

Liner bag and filter are disposable, leaving only the spray gun and adapter to be cleaned. The 3M™ PPS™ Paint Preparation system is a cleaner, faster system, safe from outside contamination and offers considerable time and solvent savings on gun and parts cleaning.

## KEY SYSTEM FEATURES

- Up to 70% savings of clean solvent
- Closed system reduces outside contamination
- Faster system from mixing to disposal
- Spray gun can function at any angle
- Available in three sizes – 200mL, 650mL & 850mL
- Less operator exposure to solvents and reduction in VOC's

## SERIES 2.0 PPS™ FEATURES

- Four-point connection on the adapter to the lid for increased stability
- Quarter turn lid locking system for quick assembly and disassembly
- Larger fluid passage opening in the adapter and lid to allow more material flow
- Standard hard cups have measurements printed
- Lids and collars combined into one piece
