

## Krystal® High Build Sealer

C140729

### PRODUCT OVERVIEW

Krystal® High Build Sealer by ML Campbell is a non-yellowing, HAP's compliant, high solids acid catalyzed sealer with exceptional sag resistance. Krystal® High Build Sealer will produce an easy sanding finish with very good durability and high resistance to water, solvents and chemicals - typically achieving a dry film thickness of +2 dry mils, double the film build of a typical sealer reducing both labor and coating costs.

Krystal® High Build Sealer is much more durable and moisture resistant than conventional nitrocellulose or vinyl sealers with added benefits of easy application, quick drying, high solids and build.

### PERFORMANCE

- 24-hour pot life
- Best performance when used within first 8 hours
- Non-yellowing
- Higher build
- Better hang with great sag resistance
- Excellent sanding properties with reduced sand-throughs
- Quick drying and easy-to-apply
- One sealer + one topcoat = KCMA approval
- True two coat system - eliminates steps
- Great for cabinets, millwork, furniture...
