

# Industry-leading architectural-grade veneers

through innovation, inventiveness, & artisanship

## Wood by Design.

ALPI's Wood Collection exemplifies their ability to create woods with natural colors, textures and grain. The result of assiduous research & development, technological innovation, inventiveness, and artisanship, ALPI veneers are ideal options for covering any type of surface.

Explore ALPI veneers and prefinished panels available from Atlantic Plywood.

### AlpiLignum (*Unfinished*)

Made of real wood, AlpiLignum is a non-printed, designable product made by disassembling and reassembling the raw material in infinite ways, creating a limitless number of wood types, finishes and patterns for veneer – a fascinating and complex procedure that requires inventiveness and skilled craftsmanship in equal amounts.

### AlpiReady (*Prefinished*)

AlpiReady is a decorative surface of prefinished wood, ready for use, made of two layers of AlpiLignum joined by adhesive film. The product is durable, flexible and easy to use, shortening the time and effort spent on panel fabrication and installation. ALPI also produces matching edgebanding for each pattern.

## Finishes

**TOUCH:** Maintains the naturalness of wood while being soft and pleasant to the touch

**GROOVE:** Emphasizes the grain and textural quality while being like raw wood to the touch

**WAX:** A matte finish rendering the delicate appearance of wax-treated wood

**OIL:** Enlivens the color of the wood while giving it the typical sheen of natural-oil treatments
