

STOCKING INVENTORY SHEET

**European Design.  
Made for the American  
Market.**

**THE SMILE SYSTEM**  
Cabinet & Furniture Levelers

Floors are rarely level. This creates challenges and often requires the installer to crawl flat on the floor to make the necessary adjustments. The New Smile System eliminates these obstacles with the use of an Adjustment Tool which can be conveniently operated by hand with or without extension handle to save installation time. The new patented foot design provides an adjustment of the cabinet up to 1".

“ **The Smile base cabinet leveler system offers innovative adjustment techniques suitable for all toe kick heights.** ”

**APC STOCKED LEVELER PRODUCTS**

Item Number	Product Description
